

# FLUVAL FX5

## Professional and Extremely Powerful Canister Filter

For aquariums of up to 1,500 litres.  
Pump performance 2,300 litres  
(3,500 litres - without load) per hour.  
5.9 litres of filtering volume.

**Instructional DVD included  
for easy setup  
No guesswork. No confusion**

Innovative lift-out stack of media baskets for optimum access and easy changing of the filter media. By means of the two T-handles you can easily lift and take apart the filter baskets.

Multi-stage Filtration with 3-step mechanical filtration.

3 media compartments for flexibility and multiple filter media arrangements.

Smart Pump™ technology  
Designed for reliable filtration in a finely adjusted aquarium environment, the Smart Pump™ technology is equipped with a microchip which permanently monitors the pump. Speed and efficiency of the magnetic impeller are constantly monitored in order to guarantee a powerful water flow and highest energy efficiency.

**Self-Priming (Plug & Start)**

Just add water and plug in. Fluval Smart Pump Technology will do the rest. No need for manual siphoning.

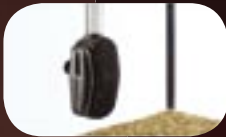

**AquaStop Valves**

Feature Click-Fit technology for fast setup and leak proof maintenance. Valves rotate and are at 45 degree angle for easy positioning.

**Multi-functional Rim Connector**

Fits most aquarium designs

**Clog-Proof Strainer**

Heavy duty anti-clogging strainer assures continuous flow.

**Two Multi-Directional Output Valves**

Twin output nozzles can be adjusted to create specific water flow.

**Purge Valve**

For easy maintenance and flushing of the canister

**Automatic water change function**

No need to carry buckets of water. Just attach appropriate hose to the output and the FX5 Smart Pump technology will do the rest.

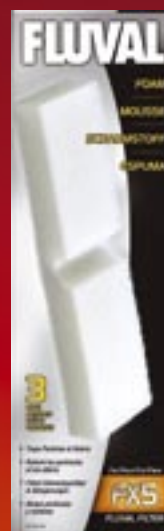

**Rim Connector**

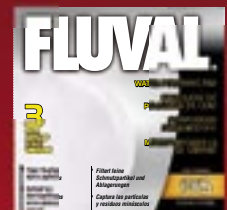

New, robust rim connector that the hoses cannot slip off.
