

FLUVAL 05

CANISTER FILTER

Instant Prime

No need for manual siphoning.

Aquastop

Stops water flow without disconnecting hoses
Eliminates leaks and mess.

Lift Lock Clamps

Securely locks cover in place. Simply lift to open for easy maintenance.

Multi-Stage Filtration

Fluval's multi-stage filtration system utilises the entire canister volume for radically increased water flow efficiency. Its mechanical stage features vertical twin foam pre-filters, to increase flow and reduce maintenance. The chemical and biological stages are housed in independent modules. This means you can change filter media independently and ensure a constant level of all important nitrifying bacteria.

IMPROVED DESIGN

- Upgraded rim connector
- Pre-assembly of main parts
- Pre-packed media
- Updated Intake Strainer
